

Azure Databricks :- Pay as you go → 1hr → Community v. DB ↓

Azure Databricks is a fast, easy to use, and collaborative Apache Spark based analytics platform. It can easily process large datasets, train machine learning models and even run real time queries on streaming data.

Azure Databrick / Databricks is an interactive workspace.

Notebook → Interactive document that includes code, visualizations and narrative text.

Dashboard → A web interface for monitoring clusters, jobs & runs.

Data → A file browser for uploading and managing data.

Experiments → A tool to organize runs into experiments to train and compare models.

Models → A registry to store trained machine learning models.

Jobs → A tool to schedule and manage jobs.

Clusters → An interface to provision and manage clusters.

Access Control :- Granular control over who can edit, access or run notebooks.
